VAN KEULEN

Family business

Complete peace of mind for your interior project

— Joop van Keulen

“Ultimately, everything we do is focused on one goal: fulfilling your wishes down to the smallest detail.”

Magista is part of **VAN KEULEN** **INTERIEURBOUW**

In 2019, our family business Van Keulen celebrated its 75th anniversary as a leading interior builder. We are happy to help you find compelling custom-made solutions to your interior design challenges.

The Magista team is ready to offer support on storage systems for cultural heritage and archives. We are here to help you realise your vision from design through to execution, in the Netherlands and abroad. We are pleased to be your partner.

Magista

Expert in storage systems and custom-made solutions

Storage systems

Magista offers a comprehensive range of storage systems. Fixed systems, mobile systems, shelving, hanging systems, compartment dividers, frames, and painting storage. Solutions for presentation, storage, capacity, height and content-related challenges are all part of our system and can be used to store hanging, flat, and upright objects in line with your needs. We translate your wishes and requirements into a uniquely configured storage system.

Custom-made solutions

Where our standard storage systems reach their limits, custom work begins. Customisation can relate to dimensions such as height, depth, and length, but it goes further than that. Our solutions can also be executed in a wide range of materials. Metal, glass, wood, plastic. The possibilities are virtually unlimited. We are happy to help you translate your wishes into a suitable solution.

Presentation solutions

Stored objects, displayed for all to see

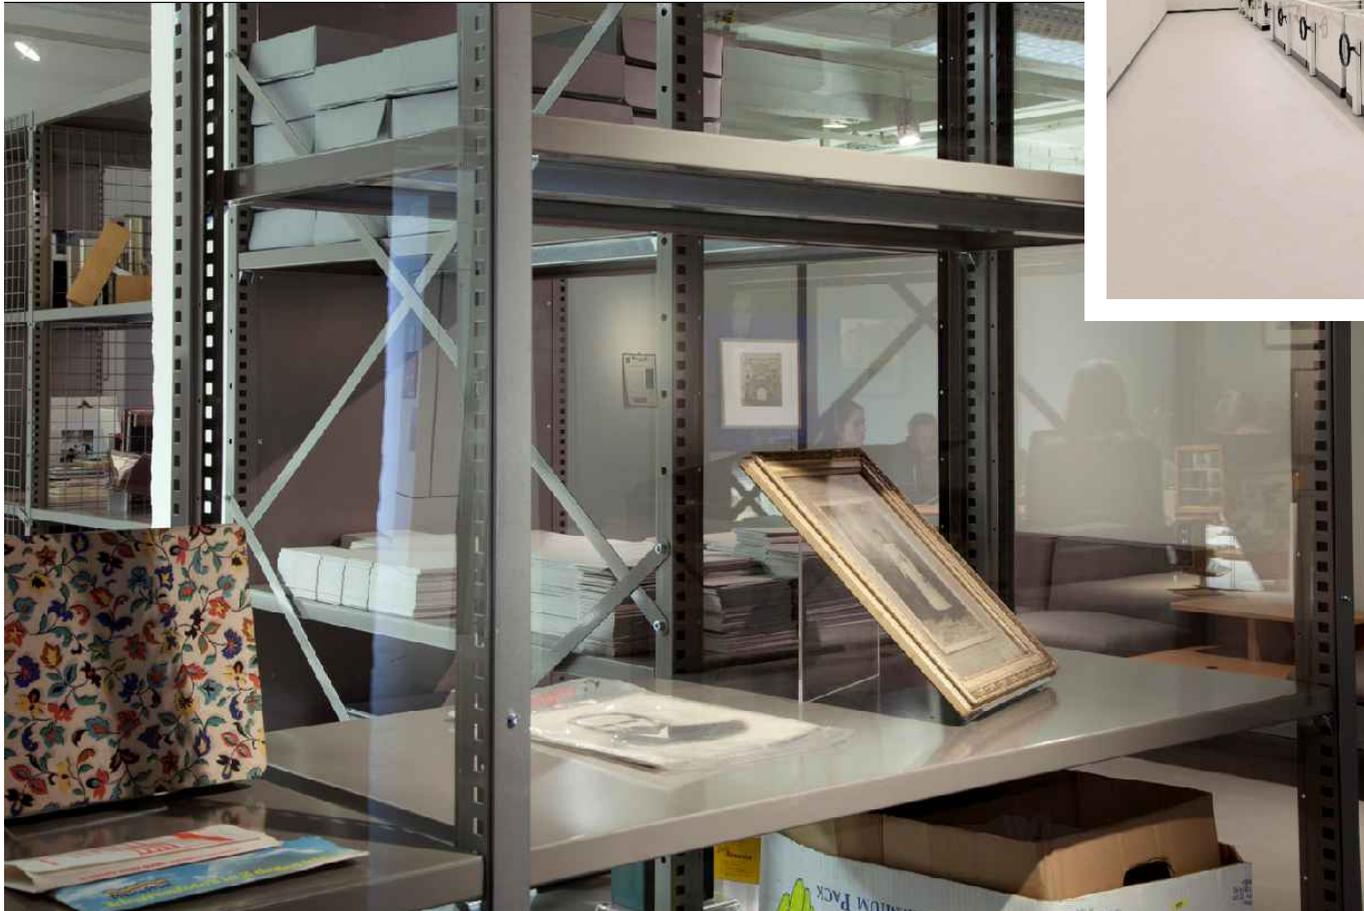

More than storage

Conservation, presentation, and visitor experience can be perfectly combined with Magista. Conservation under the correct climatic conditions is essential. We offer display solutions for books, banners, textiles, stone objects, and wet collections. Our solutions make collections accessible, while providing protection at the same time.

Storage tailored to your needs

Your situation, space, and collection form the starting point for an optimal solution. We provide custom advice on layout, storage, circulation routes, and design where required. Beyond the present, we will also help prepare you for expected developments and changes in your collections.

We also foster unparalleled experience through representative entrances, shops, or restaurants. The appearance of our solutions can be adapted to your situation and with your target audience in mind. Magista solutions can be elevated to the next level with the passion and expertise of Van Keulen Interieurbouw.

Capacity solutions

Efficient use of limited space

Flexible in every direction —
Magista also offers flexible
solutions for large objects.

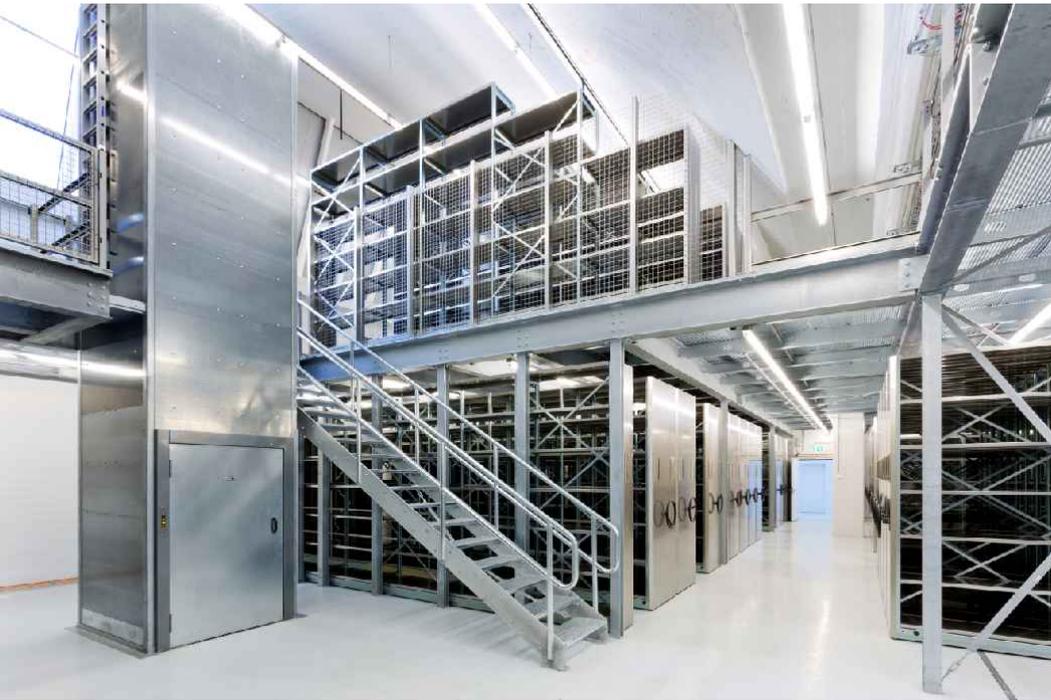

Doubling capacity within the same space

With our various height, length, and width options, we can help you make optimal use of scarce space. Mobile filing cabinets can double your storage capacity, while taller cabinets, additional levels, or mezzanines may also be appropriate solutions. Naturally, objects remain accessible, safe, and clearly organised at all times.

Height solutions

Maximise the potential of space

Optimal accessibility

Room height offers opportunities for optimal use of space with Magista systems. Our solutions are certified and supported by thorough load capacity calculations. Every collection is different and requires an individual approach.

Maximise the potential of space —
Two-level mobile cabinets on a
level floor

Content-specific solutions

Product-specific accessories

Product-specific accessories

Our products are available with specialised accessories. For drawers, a wide range of dividers is available in various sizes and designs. For shelves, options include height adjustment, dividers, glass fronts, or edge protection. Filing cabinets can be supplied open or closed, adjustable, with or without a rear panel.

Painting storage

Pull-out panels for shallow objects

A robust & compact foundation

Our all-new painting racks lift Magista's stellar reputation to even greater heights. The modular design guarantees a suitable solution in every situation.

Practicality

smooth & comfortable operation

Platform decks

Space for every object

Space for every object

Specifically for large objects such as furniture, we have developed platform decks, movable platforms that provide robust storage capacity for your project.

Unity

all solutions based on the same system

Unrestricted access

every product is accessible from all sides

Sustainability

A choice for the future and for safety

Future

Our company is committed to sustainability. We generate energy using solar panels, burn wood residues for heating, and use rainwater for flushing. We encourage our employees to stay active through a company bicycle scheme. Many of our wooden materials are FSC-certified. Our processes and waste streams are focused on reduction and separation of custom work residual materials.

TNO

CE

For your employees and collections

We make no concessions when it comes to the safety of your staff and collections. This means that none of our products have sharp edges. Floors, stairs, and racks are extensively tested for buckling and bending loads. Structures are designed in accordance with strict structural calculations. All our coatings have an extremely low acidity level, and our wooden products are guaranteed to be emission free. An ODDY test is standard at Magista. Occupational health and safety requirements and archive quality legislation are non-negotiable. Magista-certified products from our own factory always comply with these standards, everywhere and at all times. Just as all our electric mobile systems meet the most stringent safety requirements, it also goes without saying that quality certifications such as those issued by TNO, GS, CE, TÜV, and ISO are granted where required.
